HAND DRYER

	CTN QTY
Model AO1 – Cast Aluminium Casing (HACCP Certified)	1
Model AO3 – ABS/Polycarbonate Casing (Ideal for Bathroom Installations)	1

The Dyson Airblade™ hand dryer: fast, hygienic - it actually works

The Dyson Airblade™ hand dryer is a breakthrough in hand-dryer technology. Filtering incoming air to remove 99.9% of bacteria, the Dyson Airblade™ hand dryer creates a high speed sheet of unheated air that wipes water from hands in just 10 seconds.

Powered by Dyson's digital motor, it uses up to 80% less energy than warm air hand dryers; offering significant savings - both in running costs and environmental impact.

Fast making its mark on Australia's hotel industry, this unique appliance from Dyson is introducing new technology and stylish design to hotel and resort bathrooms... and now with the HACCP Australia food handling endorsement, you can soon expect to see these within Australia's restaurant kitchens.
